(54) **PRODUCTION OF LIPOSOME CONTAINING MEDICINAL COMPONENT**

(57) Abstract:

PURPOSE: To provide a method for producing a liposome preparation containing a medicinal component and having a fine and uniform particle size without deactivating the medicinal component.

CONSTITUTION: The characteristic of this method for production of a liposome preparation containing a medicinal component is that it is carried out by dissolving a lipid in a polyvalent alcohol, adding an aqueous solution of a carrier carrying the medicinal component thereto and applying an extrusion treatment thereto.
